ACCESSORIES EQUALIZER M8

The Flat Equalizer M8 allows standard Table bases with M8 thread to be retrofitted quickly and easily. The hydraulic FLAT levelling and stabilisation technology enables height compensation of up to 6 mm on uneven floors by applying pressure to the table. The tables stand firmly on the floor and can be arranged next to each other to form a continuous row without creating annoying gaps. The Flat Equalizer M8 – available in a set of 4 – can be installed without tools; they are simply screwed on like Floor glides. The Flat Equalizer M8 has a height of 40 mm and is compatible with the Table bases Tito T, Hajo, Mesa, Kari, Kuri, Kondo, Kunin and Kurus.
